APPILI VAMSI KRISHNA

Full Stack Developer | Deep Tech Product Developer

8328603546 krishna@appili.dev https://linkedin.com/in/appilivamsikrishna
https://appili.dev/ Tirupati, AP, India https://github.com/appilivamsikrishna

EDUCATION

M.Tech Aerospace Engineering

Indian Institute of Technology Madras

08/2020 - 06/2022 Chennai, India

CGPA **9.47** / 10

- Development of a Vision Guided Aerially Launched Short Range Missile

B.E. Aeronautical Engineering

Madras Institute Of Technology

08/2016 - 04/2020 Chennai, India

GPA **8.15** / 10

- Structural Analysis of Agricultural UAV

EMPLOYEE EXPERIENCE

Senior Consultant, Full Stack Developer

Leap Metrics

12/2024 - Present Hybrid (Hyderabad)

https://www.leapmetrics.io/

Highlights: Consistently ranked **#1** individual contributor across the entire engineering organization (66 repos, 28 contributors) in PRs, commits, and code changes. Owned and delivered multiple critical modules end-to-end across a healthcare platform, driving rapid feature delivery and production stability.

Tech Stack/Tools: React, Node.js, MongoDB, PostgreSQL, Microservices, Event-Driven Architecture, Keycloak, Pendo

- Delivered 145+ Jira issues and 378 PRs in one year, ranking **#1** among all individual contributors across the organization
- Owned end-to-end delivery of Attestation Phase 2 — reason codes, history tracking, and automated email alerts.
- Led the Needs Planning UI — complex multi-step flows (add need, goal/intervention, care plan), tree-structure tables with inline date editing and real-time validation
- Built Control Center and Playground dashboards with interactive visualizations (pie charts, bar charts) for LOB, Risk Acuity, Priority Population, and Program views
- Developed MongoDB Atlas multiword search utility used across the platform
- Integrated Pendo with Keycloak for user behavior tracking, and enabling custom message delivery to customers at login screen
- Fixed a**pplication wide bugs** with permanent solutions. Upgraded application-wide common components with optimized CSS for better performance and UI uniformity
- Optimized API data fetching by implementing field-level projection — retrieving only required fields (e.g., 20 out of 70) instead of full documents, significantly reducing payload size and **improving performance by 60%**
- Reduced redundant API calls by implementing efficient data-fetching patterns and caching strategies
- Resolved high-priority production bugs within 24 hours, maintaining platform stability
- Refactored the frontend code as whole, with Tanstack Tables, and **developed ecosystem of re-usable common components**

SUMMARY

Passionate Web Developer with a flair for creating dynamic online experiences that blend intuitive design with flawless functionality. Known for delivering ***user-centric solutions.***

SKILLS

Node.js | Express.js | React
JavaScript | TypeScript | Angular
HTML | CSS | Jest | AWS Cloud
Docker | Jenkins | AWS | Jenkins
DigitalOcean | MongoDB | Sequelize
TestCafé | Figma | Canva

INTERESTS

Creative Problem Solving

Driven by the challenge of solving complex problems, when it involves blending design, functionality, and user experience.

Continuous Learning

Dedicated to lifelong learning, constantly enhancing skills through certifications, courses, and hands-on experience in various fields.

CERTIFICATIONS

Machine Learning

Stanford University - *Coursera - 2021 -* **Certificate.** Gained expertise in machine learning algorithms and principles, enhancing skills in data-driven decision-making and predictive analytics.

Creative Problem Solving

University of Minnesota - *Coursera - 2020 -* **Certificate.** Learned techniques and strategies for innovative problem-solving, enhancing creativity and effective decision-making.

MY LIFE PHILOSOPHY

There's power in your purpose !

EMPLOYEE EXPERIENCE

Senior Software Engineer
Dexian

01/2023 - 11/2023 Chennai, India

https://dexian.com/

Highlights: Architected and led full-stack and LCNC projects, delivering tailored web and mobile solutions for diverse clients.

Tech Stack/Tools: React, Node.js, JavaScript, Next.js, Express.js, Angular, TypeScript, Microservices, RPA, IDP, MongoDB, AWS, GCP, Appian, Mendix, PowerApps, OutSystems.

- Project - *Bihar Government DFS* : Developed a ***React-based frontend*** with interactive heat maps and charts for digital farmer services.
- Project - *Opportunity Management Portal* : Led and developed both ***frontend (Angular) and backend (Express)*** for an internal portal helping senior employees organize and track project opportunities.
- Project - *Catalyst*: Built a ***Next.js (React), TypeScript*** web app for screen recording, screenshot editing, and exporting to presentations or PDFs.
- Project - *Document Merger* : Developed the frontend in ***Next.js (React), TypeScript*** to merge PDFs, images, and Excel files into a single PDF document.
- Project - *Appian RPA & IDP* : Created Proof of Concepts involving ***Appian RPA and IDP*** for clients, handling PDF processing and data extraction.
- Project - *Site Inspection Mobile App* : Developed a mobile app for site inspections using ***PowerApps***.

Software Development Engineer - I
Safe Security

04/2022 - 12/2022 Remote

https://safe.security/

Highlights: Full-stack developer skilled in AWS Cloud services, DevOps, and React-based development in Agile environments.

Tech Stack/Tools: React, Node.js, TypeScript, AWS (Lambda, DynamoDB, Cognito, EC2, API Gateway, Amplify, Route 53, IAM, RDS, CloudWatch, CloudFormation), Docker, Jenkins, Redux, Jest, TestCafé, SQL, MongoDB.

- Developed and maintained ***RESTful APIs*** with ***Node.js*** and ***TypeScript***, implementing unit and integration tests using ***Jest*** to ensure high-quality code.
- Designed functional pages with ***React.js***, managed state with Redux and React Hooks, and ensured seamless page navigation with React-Router.
- Worked with ***AWS*** services (IAM, EC2, RDS, CloudWatch) and utilized CloudFormation for infrastructure templates.
- Leveraged ***Docker*** and ***Jenkins*** for CI/CD pipelines, ensuring efficient deployment and automation in ***Agile*** environments.

STARTUP ENDEAVOURS

AstroData AI

03/2024 - 10/2024

https://astrodata.app/

A curious personal (hobby) research project.

- Created as a showcase of my skills and a platform for exploring cutting-edge-tech.
- Sole architect and developer, independently building the full stack—both front-end and back-end—deployed on AWS, DigitalOcean.
- Developing a new LLM that learns and validates predictive rules, calculating event probabilities through intensive data analysis powered by advanced neural networks.
- Released version 1.0 on October 21, 2024.

Crazy GreenLife LLP

12/2023 - 10/2024 Chennai, India

https://crazygreenlife.store/

Crazy GreenLife LLP, co-founded by Appili Vamsi Krishna and Nimisha Sharma, was incorporated on April 8, 2024.

- Startup conceived at **NIFT Chennai**, during incubation, receiving mentorship and strategic support through the Fashion Entrepreneurship course, (This is an 1 year Executive MBA offered as part of incubation, formally given as PG Diploma degree

06/2024 - 10/2024

Full Stack Development [Freelance]

- End-to-end development of **ephemeris-website** for RVA, both backend & frontend.
- Upgraded & Fixed issues across RVA sites.

PERSONAL PROJECTS

Appili Dev CDN

https://cdn.appili.dev/

A user-friendly content delivery network for secure file upload and management, built using **Firebase** and **MongoDB.** **[Angular, Express]**

AstroData AI

https://astrodata.app/

A robust AI-powered platform for data-driven astrological predictions, combining data science with a sophisticated rule-based system.
[React, Express]

Planetary Ephemeris

https://planetary-ephemeris.appili.dev/

A dynamic tool for calculating and visualizing planetary positions, delivering accurate celestial insights. **[Next.js, Express]**

npm i astrodata

https://www.npmjs.com/package/astrodata

A custom NPM package offering advanced astrology calculations with an easy integration into modern software. **[Javascript, Python]**

MTech Project

https://mtech.appili.dev/

Created an advanced vision-guided missile system that uses deep learning for precise trajectory prediction in defence applications.
Python, FPGA, Machine Learning, TensorFlow

api.astrodata.network

https://api.astrodata.app/docs/

Offers secure, authenticated routes and open endpoints for detailed astrological data on astrodata.cloud and beyond. **[Express]**

ai.astrodata.network

https://ai.astrodata.app/docs/

Delivers AI-driven astrological predictions, planetary analysis, and mood predictions powered by machine learning. **[Express]**

astrodata.appili.workers.dev

https://astrodata.appili.workers.dev/docs

A Cloudflare Workers integration for efficient planetary data processing using Prokerala's API.
[Javascript]

Custom File Generator

https://example-file.appili.dev/

A simple yet handy tool that generates and downloads custom files of any name, type, and size. It is useful for testing team.

Amazon Clone - Trinity (under development)

https://trinity.appili.dev/

A full-featured Amazon clone with product listings, shopping cart, checkout flow, and authentication — built as a hands-on e-commerce project.

KEY ACHIEVEMENTS

GitHub Maintainer

Appointed as a maintainer of the *Swiss Ephemeris* repository, a crucial resource for online ephemeris systems.
Swiss Ephemeris on GitHub

Project AstroData Recognition

Received praise from renowned YouTubers and astrologers for *Project AstroData*, highlighting its innovative architecture and significant contribution to astrology technology.

Successful Rocket Motor Test

Led a team to successfully test-fire a rocket motor as part of my MTech thesis, validating key design concepts.
Watch the test fire

Teaching Assistant

Assisted in teaching the MTech course AS5030 at IIT Madras (2021)

DRDO Robotics Exposition Winner

Won the Zonal Level of the *DRDO Robotics and Unmanned System Exposition* (DRUSE) in 2018.

FFE Leadership Award

Received the *FFE Leadership Award* in 2018 and 2019, recognizing leadership potential and academic excellence.

High Distinction in Mathematics

Achieved High Distinction in Mathematics from *UNSW Global, University of New South Wales*, Sydney, Australia (2010).

Spirit of Yoga Challenge

Completed the *Spirit of Yoga Challenge* (2012), demonstrating commitment to wellness and personal growth.

Outstanding Reader

Awarded as *Scholastic Reading Champion* in 2011 for exceptional reading achievement.
